# Combining Multiple PDF Files in Acrobat 6

1. Open Adobe Acrobat 6.

2. Click File > Create PDF > From Multiple Files.

3. Click Browse to locate the PDF files to be combined.  Double-click a PDF file to add it to the list, or use the [Ctrl]-click combination to select multiple files in the same directory and then click Add.

4. To change the order of files in the list, select the appropriate PDF and click Move Up or Move Down as needed.

5. Click OK when all of the files to be combined have been added and are in the desired sequence.

6. Click File- > Reduce File Size.  Change the "Compatible with" field to "Acrobat 4.0 and later" and click OK.

7. Enter the desired filename and click Save.
